Nitish Kumar Singh

+91 7811838862 | nitishsinghslg@gmail.com | nitish.technologyhell.in | Siliguri, West Bengal

Software engineering enthusiast with strong foundations in Java, Python, OOP, DSA, DBMS, and AI/ML. Experienced in backend development, RESTful APIs, relational databases, and software engineering projects. Hands-on experience with Linux, networking, and virtualization, alongside exposure to cloud technologies. Interested in building scalable applications and solving real-world engineering challenges.

Skills

- **Programming**: Java, Python, C#
- **Databases**: MySQL, SQL Server, MongoDB
- **AI/ML**: Machine Learning, AI Fundamentals
- **Backend**: ASP.NET Core, REST APIs, SQL, CRUD
- **Core CS**: OOP, DSA, DBMS, SDLC
- **Tools & Platforms**: Git, Postman, Linux, Networking

Internships

Associate Product Engineer Intern | DeltaX — Feb 2026 – Sep 2026

- Built modular console applications using C# and object-oriented programming principles for business logic.
- Practiced SQL queries, joins, normalization, constraints, and relational database design.
- Worked with REST API development, HTTP methods, and request-response handling in ASP.NET Core applications.
- Used Git and Bitbucket for version control, branching, collaboration, and code management.

Projects

IMDb Movie Database Application| C#, ASP.NET Core Web API, SQL Server — Mar 2026 – Jun 2026

- Built a movie database application using C# and ASP.NET Core Web API.
- Designed SQL Server schemas and integrated database operations using Dapper.
- Implemented RESTful endpoints for movie data management and CRUD operations.
- Tested API endpoints and request-response flows using Postman.

Smart Home Infrastructure Hub | Linux, Networking, Cloud Infrastructure — Oct 2025 – May 2026

- Built a local-first platform integrating AI, surveillance, automation, storage, and device management.
- Deployed services using Linux, containers, virtual machines, and network-based orchestration.
- Implemented virtualization, hosting, monitoring, and resource isolation concepts inspired by modern cloud platforms.

TechDeck : A Custom MacroPad System | Embedded Systems, Python — Jul 2025 – Feb 2026

- Designed and built a programmable USB HID macropad using Arduino/STM32 and custom firmware.
- Developed a Python-based profile engine for dynamic macro mapping and workflow automation.
- Implemented hardware-software integration for real-time control, monitoring, and debugging.

Education

- **Graduation** : Siliguri Institute of Technology, B.Tech in CSE (AI/ML) | CGPA – 7.97 — 2026
- **Higher Secondary** : Birla Divya Jyoti, Siliguri, CBSE , PCM with CS | Percentage – 72 — 2022
- **Senior Secondary** : Birla Divya Jyoti, Siliguri, CBSE | Percentage – 87 — 2020

Certifications

- **Apex Development and Salesforce Automation** | Packt, Jun 2026
- **Postman API Fundamentals** | Postman, Nov 2023
- **AWS Cloud Technical Essentials** | Coursera, Jun 2026
- **Python Crash Course** | Coursera, Feb 2025

Achievements

- **4th Position – IHMMC 2026 (Global Competition)** — Feb 2026
  Ranked among top teams worldwide for innovative hardware system design, at Asansol Engineering College.
- **Winner – Smart India Hackathon (Internal)** — Sept 2025
  Developed a secure data wiping solution and emerged as winner at the institute-level Smart India Hackathon.
- **Winner – SIT Hack-a-Verse** — Mar 2025
  Led a team to first place in the college-level hackathon among 80+ competing teams.
