Nitish Singh

Engineer • Builder • Entrepreneur | Software Development, Infrastructure & Embedded Systems
Siliguri, West Bengal, India

Summary

I'm a Computer Science (AI & ML) graduate who enjoys building products from the ground up, whether that's software applications, hardware devices, infrastructure platforms, or entirely new business ideas.Over the years I've worked across software engineering, Linux infrastructure, networking, embedded systems, automation, and product development. My projects range from full-stack web applications and secure data management tools to custom hardware devices such as programmable macropads and smart infrastructure platforms.Beyond academics, I've actively participated in hackathons, innovation challenges, hardware competitions, business idea contests, and technical events, earning multiple wins at institutional and national levels. I also operate independent technology ventures where I've gained hands-on experience with product development, customer interactions, operations, and problem-solving in real-world environments.Currently, I'm focused on software engineering, cloud technologies, distributed systems, automation, and product development while continuously exploring opportunities to build impactful solutions.Open to opportunities in Software Engineering, Product Engineering, Cloud, Infrastructure, and Emerging Technology domains.

Experience

DeltaX

Associate Product Engineer
