Career Objective

I'm an aspiring Software Development Engineer with a solid background in designing, developing, and debugging software. I'm excited to work with experienced engineers and diverse teams to create and deploy high-quality, efficient, and easy-to-maintain code. I love solving complex problems and coming up with innovative solutions to build large-scale applications that meet user needs and support business goals.

Internships

Internship Coordinator
WebMarvel.in *Aug 2023 – Jan 2024*

- Coordinated internship programs, guiding new interns through onboarding and project assignments. Contributed to video editing and digital marketing campaigns, while effectively managing client communications to meet project goals and enhance client satisfaction.

Social Media Manager
Tann Mann Gaadi Foundation *Jul 2023 – Sep 2023*

- Edited and produced video content for digital marketing and advertisement campaigns. Worked closely with the marketing team to craft visually appealing and engaging videos that elevated the foundation's online presence and outreach initiatives.

Content Creator
VLE Bazaar.in *Jul 2023 – Aug 2023*

- Developed visually compelling graphics and optimized content for search engines (SEO). Edited promotional videos and created product trailers that enhanced the company's online product listings and marketing efforts.

Projects

Task Management System | MERN Stack *Feb 2024*

- Built a task management system with an admin panel for task assignment and user management. Enabled seamless account creation and updates, improving collaboration and task tracking.

Library Management System | Java with OOP *Dec 2023*

- Developed a library management system featuring book bank management, user accounts, and borrow/return tracking. Streamlined book entry and withdrawal for efficient operations.

Education Website – EduXenius | FrontEnd Web Development *Nov 2023*

- Designed an education website with an AI-based course recommendation system. The platform provides personalized course suggestions, enhancing user learning through tailored content.

Personal NAS Server | Linux, Networking *Oct 2023*

- Set up a personal NAS server offering remote file access with secured authentication. Implemented a personal cloud solution, enabling efficient and secure remote data storage.
