Siliguri, West Bengal
nitishsingh.pages.dev

Final-year B.Tech CSE student with a strong foundation in software development, hardware integration, and system-level problem solving. Experienced in Python, Java, SQL, and REST APIs, with hands-on skills in computer hardware, Arduino-based prototyping, 3D Printing and additive manufacturing, and networking. Passionate about designing efficient, reliable, and scalable solutions that bridge the gap between software and hardware technologies.

Skills

- **Languages**: Python, Java, C
- **Development**: OOP, SDLC, Git Version Control, REST APIs
- **AI&ML**: TensorFlow, Scikit-learn, Data Science
- **Databases**: SQL, MongoDB
- **WebDev**: React JS, Tailwind, UI/UX Design, Postman
- **Other Skills**: Problem-Solving, Collaboration

Internships

Project Coordinator | WebMarvel.in — Hybrid, Aug 2023 – Jan 2024

- Led a team of 25+ developers and interns to deliver scalable web & software solutions, improving delivery efficiency by 40%.
- Assisted in backend debugging and API integration using Node.js & MongoDB, optimizing query performance by 25%.
- Collaborated with teams using Agile & Git, supporting feature development and bug resolution across projects.

Projects

Smart Home Infrastructure with Server | Hardware, Networking — Oct 2025

- Working on a complete scalable infrastructure, usable for both personal / organizational purpose.
- Serves for centralized storage, computation, personal cloud services, and a bunch of IT related integrations.
- Allows for remote access from anywhere in the world, and secure user authenticated access tiers.

Custom MacroPad System Monitor | Arduino, Python, 3D Printing — Jul 2025

- Designed and developed a USB HID macro keypad with OLED stats display for CPU/GPU/RAM/Net.
- Built Python scripts with HWiNFO API for real-time monitoring; implemented macros for automation.
- Focused on firmware debugging, troubleshooting multiple input cases, and hardware-software integration.

Library Management System | Java, MongoDB, OOP — Dec 2024

- Developed a Java-based system using OOP and DSA; integrated MongoDB for scalability.
- Implemented core features like search, issue/return, and overdue tracking.
  Designed modular, bug-free architecture supporting future expansion.

Education

- **Graduation** : Siliguri Institute of Technology, B.Tech in CSE with AI/ML | AGPA – 7.63 — 2026
- **Higher Secondary**: Birla Divya Jyoti, Siliguri, CBSE , PCM with CS | Percentage – 76 — 2022
- **Senior Secondary** : Birla Divya Jyoti, Siliguri, CBSE | Percentage – 87 — 2020

Certifications

- **Google IT Automation** | Coursera, Mar 2025
- **3D Printing Programme** | CDAC, Jul 2025
- **Postman API Fundamentals** | Postman, Nov 2023
- **Python Crash Course** | Coursera, Feb 2025

Achievements

Winner – Smart India Hackathon – Internal Hackathon — Aug 2025
Initiated a project on Secure data wiping over different storage media, and turned out as the winner among 50 teams.

Winner – SIT Hack-a-Verse — Mar 2025
Lead my team to victory, 1st Position in College Hackathon, among 70+ teams, at Siliguri Institute of Technology.

Hobbies

Playing video games, making montage video edits, and listening to music.
